

## Enhancements and Benefits

### Tired of IT that doesn't work for you?

When your computers aren't working at 100%, neither are your employees. So you call your IT person and wait for them to show up – which just puts your team further behind on projects and deadlines. And when they do fix the problem,

you're stuck with another unexpected bill. The more problems you have, the more downtime, more frustration and more bills you get.

### [Complete] – a better way to do IT

At TechOne Centre, we've fixed everything about IT. Now, you can get all the upgraded hardware, up-to-date software and proactive support you need, for one predictable flat fee. Your employees can get more done every day – and you can stop wasting time on the phone with IT. We call it [Complete]. You'll call it the best productivity tool you can buy.

### Enterprise-level features for every size company

[Complete] starts with an expertly optimized installation of macOS, Apple's operating system. With [Complete], every Mac gets more than {325} proven, tested enhancements – including advanced built-in security settings, hidden power-user features, and much, much more.

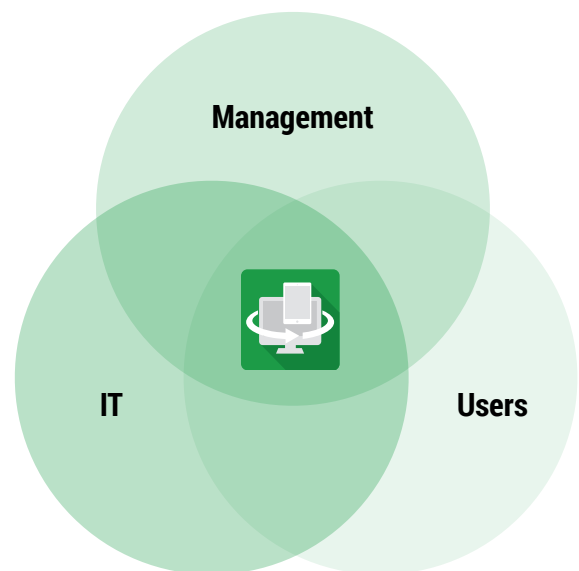

### System-wide and application-specific

We've built on our 25 years of experience to make Macs faster, more secure and easier to use.

[Complete] includes changes that improve performance system-wide, plus targeted settings that speed up your most commonly used applications.

### STEP – Security, Tech, Experience and Productivity

Right away, you'll see the difference in four key areas: security, tech support, user experience and productivity. Employees love [Complete] because it greatly improves upon Apple's user experience. The IT department loves [Complete] because it lowers support time significantly and establishes security compliance. Management loves [Complete] because it lowers IT costs and improves employee productivity. See for yourself how an all-inclusive approach to IT can work for you.
